

Fish Napkin Holder

Method

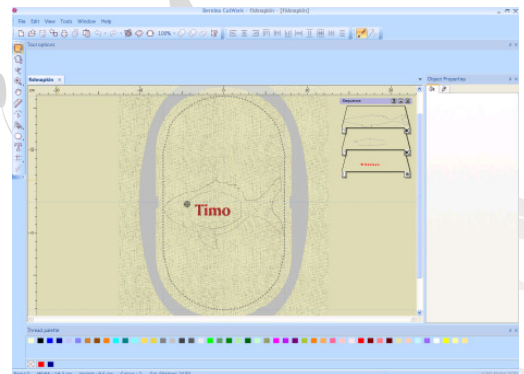

Step 1

Start the BERNINA CutWork Software and open the "fishnapkin" file in your BERNINA CutWork Samples folder.

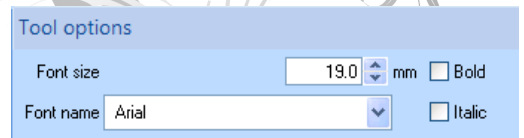

Step 2

Select "Timo" and delete it. With the  "Edit text"-function type a name and position it as desired.

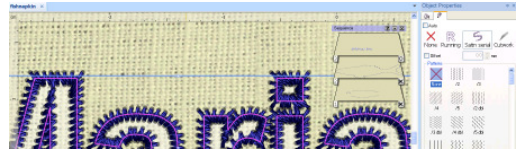

Step 3

Choose text size and font in „Tool options“.

Step 4

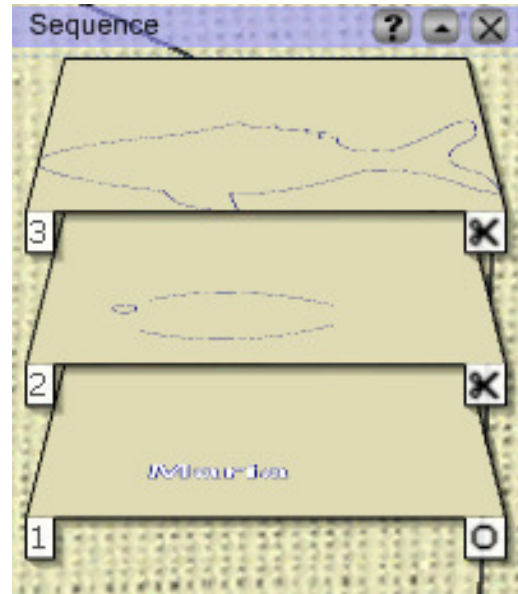

Select „Satin Serial“ and adjust the outline width as desired.

Step 5

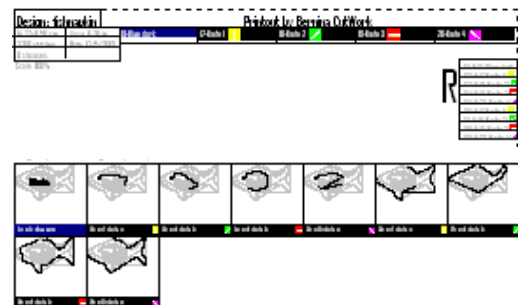

Sequence the layers:

- Level 1 contains the text
- Level 2 contains the inner lines of the fish
- Level 3 contains the outline of the fish.

Step 6

Print out a preview to see the sequence and cutting positions.

Step 7

Save your motif on a USB-stick or write it to your BERNINA embroidery machine.

Step 8

Hoop firm embroidery stabiliser and attach foam rubber with temporary adhesive..

Step 9

Stitch out your embroidery name first.

Step 10

Insert CutWork Tool and remove bobbin case. Cut out fish according to the sewing-computer instructions.

The cutting line in a CutWork design is split up and indicated in 4 different colours. The colours refer to the 4 positions of the BERNINA CutWork Tool.

Step 11

Cut out fish according to the sewing-computer instructions.

See the detailed instructions in the CutWork book that comes with your Software.
